EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Telecommunication Engineering - Pune, India Jun 2027

Vishwakarma Institute of Information Technology Grade: 8.89/10

Relevant Coursework: Data Structures and Algorithms, Operating Systems, UI/UX Design, Computer Networking, Database Management Systems (DBMS), Machine Learning

Higher Secondary Certificate (HSC) — Maharashtra State Board

May 2023

Result: 83.17%

Secondary School Certificate (SSC) — Maharashtra State Board

June 2021

Result: 97%

PROJECTS

• MentalBridge — Digital Mental Health Platform

Designed and developed a scalable cross-platform mental health system using a three-tier architecture (client, server, database), developing a student-facing application with chatbot-based assessments and interactive dashboards. Implemented retrieval-augmented generation (RAG) using embeddings and vector search with Pinecone for contextual responses. Designed institute-level dashboards and a counsellor interface enabling automated scoring and reporting workflows.

Tech Stack: MongoDB, REST APIs, Pinecone (Vector DB), OpenAI APIs, UI/UX

GitHub: github.com/ApurvaDabhade/Mental_Health_Student

• Rasoimitra — Decision Support Platform for Food Businesses

Architected and developed a full-stack application for pricing optimization, menu planning, and inventory management using Node.js and MongoDB, reducing reliance on manual workflows. Built scalable RESTful APIs and automated data pipelines via web scraping, external APIs, and n8n workflows. Integrated LLM-driven insights with ML-based demand forecasting and implemented real-time alerts using Twilio APIs for proactive decision-making.

Tech Stack: Node.js, Express.js, React.js, MongoDB, REST APIs, n8n, OpenAI APIs, Machine Learning, Twilio

GitHub: github.com/ApurvaDabhade/AI_Radar_Vendors

• Smart Krishi Advisor — Agricultural Intelligence Platform

Built a MERN-based agricultural advisory system to assist farmers with crop planning, fertilizer usage, and market insights. Integrated multi-source environmental data and applied ML-based forecasting for yield and risk. Delivered real-time access to market prices and government schemes to improve agricultural decision-making.

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, External APIs, Predictive Modeling & Risk Analysis

GitHub: github.com/ApurvaDabhade/Smart-Krishi-Advisor

SKILLS

- **Programming Languages:** Java ,C++(Basics), Python, JavaScript, SQL
- **Web Technologies:** React.js, HTML, CSS, Node.js, Express.js, REST APIs
- **Databases & Data Tools:** MongoDB, PostgreSQL, MySQL, Pandas, NumPy, Matplotlib
- **Tools & Platforms:** Git, GitHub, Postman, Docker, Firebase, VS Code, Twilio, n8n, Scrapy, Figma
- **Core Concepts:** Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Machine Learning Fundamentals, UI/UX

ACHIEVEMENTS

- **1st Runner-Up, AgriAI Hackathon 2025(VIT Pune)**
Competed among 150+ participants.
- **2nd Place, SIH Internal Hackathon 2025**
Institute-level selection for Smart India Hackathon.
- **Best Idea Award, SciTech Innovation Hackathon**
Finalist among 250+ teams.
- **UI/UX Design Intern, CodSoft** — Designed 5+ responsive interfaces and improved accessibility by 3%.
